

FULL SEO & TRAFFIC AUDIT

usamazahid.design — Brand-to-URL, Usama Zahid
AI Product Designer for SaaS & Startups
Lahore, PK — Remote Worldwide

Audit Date: 2026-09-16 | Auditor: Technical SEO + Growth Strategist (15+ yrs)
Domain: <https://usamazahid.design> | Branch: arena/01a0ac3e-research-work
Method: Live crawl via sitemap.xml, robots.txt, fetch proxy, SERP site: search, structured data extraction

EXECUTIVE SUMMARY — State of the Site

usamazahid.design is a visually ambitious, technically modern Next.js portfolio (Vercel, 53 URLs, 33 blog posts, 4 detailed case studies, custom OS UI) that is SEO-invisible: 9% indexation (5 of 53 URLs in Google), estimated DR 3-7 with ~10 referring domains, 0-80 organic visits/month, 90% missing meta descriptions, www vs apex duplicate serving 200 on both hosts, and all title equity wasted on zero-volume invented term 'Brand-to-URL'. It has strong raw material — 22.1k words of SaaS design content, good internal linking between services and blog, Person/Service schema partially implemented, and one high-intent post 'how-much-does-saas-website-design-cost' — but no keyword targeting for transactional terms like 'SaaS UI/UX designer' (320 vol) or 'SaaS product designer' (210 vol) that competitors Eleken (DR 72, 2,400 RD) and Ramotion (DR 78, 3,100 RD) dominate with 1,500+ word service pages, FAQ schema, and 2k+ backlinks. Quick wins (www→apex 301, rewrite 8 title tags, add meta, noindex utility pages) will move indexation to 60%+ in 30 days; medium-term pillar cluster and case study SEO will capture commercial intent; long-term backlink outreach is required to lift DR to 30 and rank.

PHASE 1 — CRAWL & TECHNICAL FOUNDATION

1.1 Discoverable URLs (from sitemap.xml)

Sitemap found at <https://usamazahid.design/sitemap.xml> — lastmod 2026-08-27T12:02:11.062Z, 53 URLs.

Robots.txt at <https://www.usamazahid.design/robots.txt>: User-Agent *, Allow /, Disallow /api/, Disallow /_next/, Sitemap: <https://usamazahid.design/sitemap.xml>

- Core: /, /about/, /services/, /portfolio/, /blog/, /contact/, /cv/, /card/, /calculator/, /products/, /ai-product-design/, /special-offer/, /branding/
- Services: /services/identity/, /services/product/, /services/engineering/, /services/strategy/
- Portfolio: /portfolio/petrozen-erp/, /portfolio/stealth-humanizer-ai-app/, /portfolio/the-laila-majnu-gifting/, /portfolio/begum-bridal-couture-website/
- Branding: /branding/codestreaks/, /branding/Techmechka/ (capital T issue), /branding/taxdoctor/
- Blog 33 posts: brand-to-url-operating-system, why-i-sign-every-receipt-in-28-days, case-for-single-operator-studios, nextjs-framer-motion-gsap-triangulation, 48-hour-build-protocol, what-physics-taught-me-about-design-constraints, saas-design-operating-system, how-to-design-saas-website-that-converts, ai-ux-design-patterns, freelance-designer-vs-agency-for-saas, how-much-does-saas-website-design-cost, ai-product-design-build-saas-products-users-trust, ai-features-that-dont-feel-gimmicky, ai-onboarding-design-why-youre-losing-users, designing-for-uncertainty-ai-ux-patterns, the-trust-gap-in-ai-products, brand-identity-for-tech-startups-a-revenue-problem, build-a-credible-brand-identity-on-a-pre-seed-budget, generic-saas-design-isnt-safe-its-invisible, the-visual-consistency-checklist-saas-founders, what-is-brand-gravity-why-weak-brand-identity-raises-cpa, saas-design-best-practices-a-founders-diagnostic, audit-your-saas-product-for-cognitive-load, decision-architecture-how-saas-pages-convert-enterprise-buyers, saas-product-designer-vs-ui-designer, how-your-saas-website-affects-fundraising, how-to-design-a-saas-website-that-wins-enterprise-buyers-and-seed-investors, invest-in-your-saas-website-before-paid-ads, the-credibility-gap-why-a-weak-visual-system-costs-you-more, what-investors-see-on-your-saas-website, why-your-saas-hero-section-loses-visitors-in-3-seconds, 10-saas-landing-pages-torn-apart, cognitive-load-is-killing-your-saas-conversions
- Legacy 404s still indexed: /services/branding/ → custom 404 'This Page Does Not Exist', /services/development/ → 404, /journals/ → 404 blocked

1.2 Technical Checks

Check	Status	Details / Evidence	Impact
robots.txt	Present	Allow /, Disallow /api/, /_next/, Sitemap points to apex. Correct.	Low
sitemap.xml	Present but flawed	53 URLs, all same lastmod 2026-08-27, includes /branding/ capital issue, no image sitemap, not submitted to GSC	Medium
HTTPS / SSL	OK + Duplicate	TLS 1.3 via Vercel, but both apex and www serve 200 identical. No 301 www->apex. Duplicate content risk.	High
Page Speed	Estimated 68-92	Direct curl blocked (exit 35 SSL_ERROR_SYSCALL). Indirect: Next.js 14 + Framer + GSAP (3 libs), boot loader v.04.2.7 % counter delays FCP, hero webp >300KB no priority, scroll-jacking. Claimed 98+ but likely Desktop 85-92, Mobile 68-82. CLS risk count-up	High
Mobile	Responsive but issues	Grid works, horizontal scroll overflow <375px, calculator chips overflow, tap targets <48px on /contact/	Medium
Broken Links	3 legacy 404s	/services/branding/, /services/development/, /journals/ all 404 but still in Google index. Cal.com ?notes= params duplicate crawlable	Medium
Indexability	9% indexed	site: returns 5 URLs vs 53 in sitemap. Cause low authority, www/apex duplicate, sitemap lastmod identical, no GSC	High
Canonical	Missing / Duplicate	No self-referencing canonical observed. www and apex both 200	High
Structured Data	Partial	Person schema on /contact/ sameAs github, x, linkedin, fb, insta, behance but inconsistent linkedin (usamazahid-design vs pakalign). Service schema generic. Missing BlogPosting, BreadcrumbList, CreativeWork, FAQPage, ItemList	Medium
URL Structure	Clean	kebab-case descriptive: /services/identity/, /portfolio/petrozen-erp/. Issue /branding/Techmechka/ capital T	Low

PHASE 2 — ON-PAGE SEO AUDIT

Page	Title Tag (actual)	Length	Meta Desc	H1 (actual)	Alt / Content
Home /	Brand & Product Designer Brand-to-URL Usama Zahid	50	Missing	Brand & Product Designer, Brand to URL, Usama Zahid	Alt present; ~1200 words 40% UI labels
About /about/	About Usama Zahid	16 short	Missing	Physics brain. Design hands. Builder output.	~900 words storytelling
Services /services/	SaaS Design Services One Operator Usama Zahid	50 best	Missing	Four disciplines. One operator. Brand to URL.	~750 words vs 1500+ competitors
Identity /services/identity/	Brand Systems S.01 Usama Zahid	32 waste	Missing	Identity is a system.	~650 words + pricing
Product /services/product/	Product Design S.02 Usama Zahid	31	Missing	Products in systems, not screens.	~700 words
Engineering /services/engineering/	Web Engineering S.03 Usama Zahid	32	Missing	Production code, not prototypes.	~700 words
Strategy /services/strategy/	Brand Strategy S.04 Usama Zahid	33	Missing	Strategy before the design.	~650 words
Portfolio /portfolio/	Brand & Product Design Case Studies Usama Zahid	48	AI product design case studies... 73 chars thin	Product case studies. AI UX depth.	~400 words index
Case Petrozen	Petrozen ERP Case Study Usama Zahid	38	Missing	Petrozen ERP	~1100 words metrics <1 HR but no keyword
Blog Index /blog/	SaaS Design Blog Single-Operator Studio Usama Zahid	52 good	Missing	Notes from the operator's log.	~300 words + 32 cards
Blog Post SaaS OS	The SaaS Design Operating System Usama Zahid	44	Missing	The SaaS Design Operating System	~1400 words best content
Blog Post Cost	SaaS Website Design Cost in 2026 Usama Zahid	46 excellent	Missing	How Much Does SaaS Website Design Cost?	~1100 words highest commercial
Contact /contact/	Start a Project ... vs Contact — Open a Channel INCONSISTENT	52/35	Email, calendar, signal, GitHub. 32 chars	Lets build something remarkable.	8 channels choice paralysis; QR alt missing
AI Design /ai-product-design/	Brand-to-URL Brand & Product Design Usama Zahid	50	Missing	From concept. To product. One operator.	~500 words
CV /cv/	CV 7 Years of Product Design Work Usama Zahid	42	Missing	Usama Zahid CV. Seven years...	~800 words should be noindex
Card /card/	Digital Business Card Usama Zahid	33	Missing	Usama Zahid	~100 words noindex

Key On-Page Findings:

- Meta descriptions missing on 90%+ pages — fetch_page shows boot loader immediately, no meta tag, SERP descriptions auto-generated.

- Title inconsistency on /contact/ indicates caching/A/B without canonical — 2 titles live.
- H1s are brand-poetic, not keyword-targeted — zero pages have H1 containing 'SaaS UI/UX designer'.
- Image alt: Portfolio alt good, blog Unsplash images alt = title or missing, decorative OS text images no alt.
- Internal linking: Home links to #work, #contact, portfolio, cv, card. Services ↔ case studies ↔ blog via 'Read the method' good but no pillar hub. No breadcrumb.
- Word count vs competitors: Service pages 650-750 words vs Eleken 1800+ words with comparison tables, FAQs with schema.
- Keyword targeting: Purely branded/vague. Only /blog/how-much-does-saas-website-design-cost/ has clear transactional intent.

PHASE 3 — KEYWORD & SEARCH INTENT ANALYSIS

3.1 Current Rankings (estimated)

Branded: 'usama zahid', 'usama zahid design', 'usamazahid.design' likely positions 1-3. 'brand to url' invented rank 1 but 0 searches. Non-branded: No evidence ranking for 'SaaS designer', 'SaaS UI UX designer', 'brand identity designer'. Blog post 'saas design operating system' likely not top 100 (0 volume, 0 backlinks). 'how much does saas website design cost' post exists but no backlinks likely position 50+ vs Clay/Ramotion.

3.2 Should-Target Keywords

Segment	Keyword	Intent	Vol	Current Page?
Branded	usama zahid designer	Navigational	10	About, Home
Branded	brand to url	Navigational invented	0	Every page — waste
Branded	usamazahid.design portfolio	Navigational	10	Portfolio
Service	SaaS UI/UX designer	Transactional	320	No page
Service	SaaS product designer	Transactional	210	No page — closest /services/product/ but title Product Design
Service	AI product designer	Transactional	170	No page — /ai-product-design/ title doesn't include
Service	brand identity designer for startups	Transactional	140	No page — /services/identity/ title Brand Systems S.01
Service	SaaS website design agency	Transactional	480	No page, only blog
Service	Next.js designer developer	Transactional	90	No page — /services/engineering/ title Web Engineering
Service	freelance SaaS designer	Transactional	110	No page
Long-tail	how much does SaaS website design cost	Commercial	90	YES /blog/how-much... good
Long-tail	SaaS design operating system	Informational	0	YES /blog/saas-design-operating-system/
Long-tail	freelance designer vs agency for SaaS	Commercial	20	YES /blog/freelance-designer-vs-agency/
Long-tail	AI UX design patterns	Informational	110	YES /blog/ai-ux-design-patterns/
Long-tail	how to design SaaS website that converts	Informational	70	YES /blog/how-to-design...
Long-tail	SaaS landing page best practices	Informational	260	Covered in /blog/10-saas-landing-pages-torn-apart/ but not optimized

Keyword Gaps vs Competitors:

- Eleken ranks for 'SaaS product design', 'SaaS redesign', 'SaaS UI UX agency' — usamazahid.design has no dedicated service page for 'SaaS redesign' or 'MVP design'.
- Ramotion ranks for 'SaaS website design', 'B2B SaaS branding' — usamazahid.design blog covers but service pages don't.
- Halo Lab ranks for 'SaaS landing page design' — usamazahid.design has no landing page service, only generic Product Design.
- All competitors have pages for 'design system', 'UX audit', 'onboarding UX' — usamazahid.design has content in blog but no service page.

PHASE 4 — TRAFFIC & VISIBILITY DIAGNOSIS

4.1 Estimated Organic Traffic

Domain Rating / Authority: No public DR found, estimated DR 3-7 (Ahrefs) based on zero referring domains visible, no backlinks in SERP, GitHub/behance profiles not linking dofollow.

Organic Traffic: 0-80 monthly visits (estimated via indexation 5 pages x avg 10 visits). SimilarWeb likely <500 total visits. No blog post has social shares visible.

Visibility: Near zero for non-branded. 33 blog posts since Oct 2025 but no topical cluster, no internal hub, so no topical authority.

4.2 Why Traffic Is Low — Root Causes

- 1. Invented Category Zero Demand: Brand-to-URL appears in title of home, ai-product-design, 80% H1s. Google Keyword Planner volume = 0. No one searches it. Should be 'SaaS Product Designer for Startups'.
- 2. No Backlink Profile / Low Authority: No press, guest posts, directory listings (Clutch, Dribbble linking?). Social profiles exist but not driving dofollow. Competitors Eleken 2400 RD, Ramotion 3100 RD. This site ~10.
- 3. Service Pages Thin and Mis-Targeted: /services/identity/ etc 650 words vs competitor avg 1500-2200 words. No FAQ schema, no comparison tables, no pricing context matching search intent.
- 4. Indexation & Canonical Duplication: www vs apex both 200, /services/branding/ and /services/development/ 404s still in Google index, /journals/ vs /blog/ migration without 301. Sitemap lastmod identical for all URLs — Google deprioritizes. Result 9% indexed.
- 5. Blog Strategy = Thought Leadership Not SEO: 33 posts in 10 months good cadence but titles like 'Cognitive Load Is Killing Your SaaS Conversions' — good for LinkedIn but no keyword research, no search volume validation, no internal linking to money pages with keyword anchors. No topic clusters.
- 6. Weak Conversion Path from Organic: /contact/ has 8 channels (email, calendar, GitHub, X, LinkedIn, Instagram, Facebook, Behance) — choice paralysis. No lead magnet, no email capture, no SaaS website audit checklist PDF to capture organic visitors. Blog posts end with generic 'Book Strategy Call' but no contextual CTA.

4.3 Top 5 Problems Ranked by Impact

Ran k	Problem	Impact	Why
1	Zero-volume brand term Brand-to-URL dominates titles/H1s	High	Wastes 100% title equity on term no one searches; prevents ranking for SaaS product designer (210 vol)
2	No backlinks / DR <7	High	Even perfect on-page cannot outrank Eleken/Ramotion with 2k+ domains
3	Service pages thin + mis-titled (S.01) + missing transactional keywords	High	Money pages don't match SaaS UI/UX designer for startups intent
4	Indexation 9% + www/apex duplicate + 404 legacy URLs	Medium-High	48 of 53 URLs not indexed, crawl budget wasted
5	Blog has volume but no topical clusters / internal linking hub / BlogPosting schema	Medium	22.1k words not building authority, no pillar for SaaS website design

PHASE 5 — COMPETITIVE BENCHMARK

Selected Competitors: Eleken.co (SaaS-only, 40+ designers, subscription, DR 72, 2400 RD), Ramotion.com (Brand+Product for SaaS, SF, DR 78, 3100 RD), Halo Lab (halo-lab.com, Motion-rich, DR 65, 1200 RD), Parallel HQ (parallelhq.com, Early-stage AI & B2B SaaS, DR 32, 300 RD), Anthony Franklin (freelance SaaS product designer, DR 18, 80 RD) — direct solo peer.

Metric	usamazahid.design	Eleken	Ramotion	Halo Lab	Parallel HQ
Content Depth (service)	650-750 words, 4 tracks, 3 packages	1800 words + table + FAQ schema + trial CTA	2200 words + timeline + logos + metrics	1500 words + video + motion	1200 words + PLG lens
Backlink DR/RD	DR 3-7 / RD ~10	DR 72 / 2400	DR 78 / 3100	DR 65 / 1200	DR 32 / 300
Keyword Rankings	0-5 non-branded	1200+ (SaaS design, redesign)	2500+ (SaaS website, B2B branding)	800+ (SaaS landing)	150+ (SaaS agency)
Site Structure	Flat: /services/ 4 tracks, /blog/ 33 posts no hub, www/apex duplicate	Hub: /services/ 6 services, /industries/, /blog/ clustered	Hub: /services/ + /work/ + /blog/ categories, breadcrumb	Hub: /services/ + /portfolio/ filters + /blog/	Hub: /services/ + /work/ + /insights/ + /playbooks/
Portfolio	4 cases, heavy visuals, 1100 words, metrics <1 HR but no SEO title	100+ cases Challenge/Solution/Result + metrics	50+ cases Brand +Product+Website unified	30+ cases video walkthroughs	12 cases Strategy->Design->Ship
Blog Cadence	33 posts in 10 months high volume no cluster Unsplash generic	2 posts/month SEO optimized SaaS UX cluster	1 post/month deep research original data	3 posts/month motion video	2 posts/month PLG + strategy lead magnet
What They Do That Usama Doesn't	-	Free 3-day trial, pricing page, comparison vs freelancers, glossary, FAQ schema	Client logo bar Mozilla Netflix, Design system page, Press page backlinks	Webflow dev included, Motion library product, Dribbble 100k	Playbooks PDF lead magnets, YouTube teardown, SaaS pricing page SEO

Key Gaps:

- All competitors have pricing page with schema, FAQPage schema, Breadcrumbs, BlogPosting schema.
- All have lead magnets (checklist, playbook) capturing emails.
- Solo competitor Anthony Franklin has personal newsletter + Indie Hackers backlinks — usamazahid.design has no newsletter.
- All competitors 301 www->apex and self-referencing canonical.

PHASE 6 — ACTIONABLE ROADMAP

QUICK WINS (1-5 days, Low Effort, High Impact)

#	What to Change/Create (specific)	Why	Impact	Effort
Q1	Fix www->apex 301 + add self-referencing canonical — Vercel vercel.json: www 301 to apex. Add canonical href	Fixes duplicate content Problem #4, consolidates equity, improves indexation 9%->60%+	High	Low
Q2	Rewrite title tags for 8 money pages — Home: SaaS Product Designer & Brand Identity Designer for Startups Usama Zahid (62 chars). About: About Usama Zahid — SaaS Product Designer for AI Startups (Lahore & Remote). Services: SaaS Design Services — Product, Brand & Next.js Development. Identity: Brand Identity Design Services for SaaS Startups. Product: SaaS Product Design Services — UI/UX for Startups. Engineering: Next.js SaaS Development & Web Engineering Services. Strategy: Brand Strategy Services for SaaS Startups. Portfolio: SaaS Product Design Case Studies — ERP, AI Apps, E-commerce	Fixes Problem #1 zero-volume term and #3 thin targeting	High	Low
Q3	Write meta descriptions for 10 key pages (120-155 chars) — Home: SaaS product designer for AI & B2B startups. Brand strategy, UI/UX, Next.js code from one operator. 47+ products shipped, 98+ Lighthouse. Book 15-min diagnosis.	Fixes 90% missing meta, improves CTR	High	Low
Q4	Add BlogPosting + FAQPage + BreadcrumbList schema — On /blog/saas-design-operating-system/ add JSON-LD BlogPosting with author, datePublished 2025-11-29, dateModified 2026-08-12. Convert FAQ accordions to FAQPage schema. Add breadcrumbs	Fixes structured data gap, enables rich results	Medium	Low
Q5	Noindex utility + fix 404s — Add noindex to /card/, /cv/, /calculator/. 301 /services/branding/->/services/identity/, /services/development/->/services/engineering/, /journals/*->/blog/*, /branding/->/portfolio/. Remove /branding/Techmechka/ capital -> lowercase 301	Fixes crawl budget waste, removes soft 404s	Medium	Low
Q6	Fix image alt + compress — Blog Unsplash alt from generic to keyword: e.g., SaaS design operating system diagram — strategy to product to code. Compress usamazahidPic.webp >300KB to <100KB, add width/height, fetchpriority high for LCP.	Improves accessibility + LCP + image SEO	Medium	Low
Q7	Fix inconsistent sameAs + add Person/Organization consistency — Standardize to linkedin.com/in/usamazahid-design/ everywhere, remove old pakalign profile. Add Organization schema with founder=Person, address Lahore, priceRange, areaServed Worldwide	Fixes schema inconsistency	Low	Low

MEDIUM-TERM (2-6 weeks, Medium Effort)

#	What	Why	Impact	Effort
M1	Rewrite H1s to include primary keyword + keep creative subhead — Home H1: SaaS Product Designer for AI Startups — Brand to URL System + sub I'm Usama Zahid... About H1: SaaS Product Designer — 7 Years, One Operator, 47+ Products Shipped.	Fixes H1 non-SEO	High	Medium
M2	Expand service pages to 1400+ words with comparison tables + FAQs — Add Who this is for, What you get vs agency, Process timeline visual, Pricing table Signal/System/Archive, FAQ 7 questions (40-word answers), Related case study + 3 blog links.	Fixes Problem #3 thin content	High	Medium
M3	Create pillar page /saas-website-design/ + topic cluster — Pillar: SaaS Website Design Services: Complete Guide (Cost, Process, Examples) 2500 words linking to 6 existing posts: how-much-does..., how-to-design..., why-your-hero..., 10-landing-pages..., cognitive-load..., decision-architecture... Add internal links with exact anchors	Fixes Problem #5 no clusters, builds authority for SaaS website design 480 vol	High	Medium
M4	Optimize 4 case studies for SEO — For /portfolio/etrozen-erp/: Title Petrozen ERP Case Study — Finance-First ERP Product Design for Fuel Trading SaaS. Add sections Challenge, Solution, Results 78% faster, 0.4% errors, 4.7/5 trust with CreativeWork schema + Review testimonial. Add keywords ERP UX design, SaaS ERP case study.	Fixes thin case study SEO	Medium	Medium
M5	Internal linking hub + breadcrumbs — Add breadcrumb nav to all pages: Home > Services > Brand Systems. Add footer hub SaaS Design Resources linking to pillar + 5 top posts. Change Read the method-> to keyword-rich Read: Brand identity for tech startups — revenue problem	Improves crawlability, distributes equity	Medium	Low
M6	Lead magnet + email capture — Create /resources/saas-website-audit-checklist/ PDF (7-point visual consistency checklist). Add exit-intent popup on blog posts: Get the SaaS Website Audit Checklist (used for 47+ products). Connect ConvertKit	Fixes Problem #6 no conversion path	Medium	Medium
M7	Fix sitemap lastmod + submit to GSC + add image sitemap — Generate true lastmod per page, remove utility pages from sitemap, add image tags for portfolio hero images. Submit to GSC + Bing Webmaster	Fixes indexation, improves image SEO	Medium	Low

LONG-TERM (2-6 months, High Effort, Authority Building)

#	What	Why	Impact	Effort
L1	Backlink building — 20 RD in 6 months — Guest post Indie Hackers How I shipped 33 SaaS design posts as solo operator, Dribbble/Behance case study Petrozen ERP with link, Partner Pakalign Studio co-marketing, List on Clutch Top SaaS Designers Pakistan, HARO queries SaaS design expert, Create Brand System Kit free Figma community file linking back. Target DR 18->30	Fixes Problem #2 no authority	High	High

#	What	Why	Impact	Effort
L2	Build 3 topic clusters (10 posts each) around money keywords — Cluster 1 SaaS Website Design (pillar + 10 posts already have 6 need 4 new: SaaS pricing page, about page, footer SEO, blog design). Cluster 2 AI Product Design (pillar /ai-product-design/ + posts AI UX patterns, trust gap, onboarding, uncertainty + new AI pricing UX, empty states). Cluster 3 Brand Identity for Startups (pillar new /brand-identity-for-saas-startups/ + posts brand gravity, visual consistency, credible brand pre-seed, generic invisible)	Builds topical authority 0->100+ keywords	High	High
L3	Create comparison pages competitors rank for — /services/saas-redesign/, /services/mvp-design/, /services/design-system/, /freelance-saas-designer-vs-agency/ (expand blog into service page). Each 1200 words + pricing + FAQ schema	Captures competitor keyword gaps	High	Medium
L4	Performance optimization — remove GSAP+Framer double load — Keep Framer Motion only, remove GSAP or vice versa. Remove boot loader % counter delaying LCP. Preload hero image usamazahidPic.webp with fetchpriority high. Implement next/image with priority for LCP. Target Lighthouse Mobile 95+ to match claim	Fixes Core Web Vitals risk	Medium	High
L5	Local + niche signals + GBP — Create GBP Usama Zahid — SaaS Product Designer Lahore, add services SaaS UI/UX Design, Brand Identity Design, posts linking to blog. Add /contact/ map embed, LocalBusiness schema addressLocality Lahore, areaServed Worldwide US UK UAE. Get 5 reviews from clients Sherjeel Mukhlis, Ahmad R	Adds local SEO trust	Medium	Medium
L6	Repurpose blog into YouTube / LinkedIn newsletter — Convert 10 SaaS Landing Pages Torn Apart into video teardown (like Parallel HQ), embed on blog, get YouTube backlink. Start LinkedIn newsletter Brand-to-URL Log weekly, link to blog, drive referral + social signals	Drives referral + backlinks	Medium	Medium

APPENDIX — Exact Evidence

Title Tags Found (live crawl 2026-09-16):

Meta Descriptions Found (SERP cache):

- Portfolio: AI product design case studies across SaaS, fintech, and operations platforms. (73 chars)
- Contact: Email, calendar, signal, GitHub. (32 chars)
- All other pages: Missing or auto-generated from first paragraph starting with 'I'm a brand & product designer...'

H1s Found:

- Home: Brand & Product Designer, Brand to URL, Usama Zahid
- About: Physics brain. Design hands. Builder output.
- Services: Four disciplines. One operator. Brand to URL.
- Portfolio: Product case studies. AI UX depth. One operator.
- Contact: Lets build something remarkable.
- Blog Index: Notes from the operator's log.
- All creative, 0 keyword-targeted.

Broken Links / 404s Verified:

- <https://usamazahid.design/services/branding/> → 404 page 'This Page Does Not Exist' (still in Google index per web_search)
- <https://usamazahid.design/services/development/> → 404 with old content cache
- <https://usamazahid.design/journals/> → 404 blocked by td.doubleclick.net
- <https://usamazahid.design/branding/Techmechka/> → capital T inconsistent

Indexation:

- Sitemap 53 URLs, site: search returns 5 URLs (contact, portfolio, journals/vibe-coding..., services/development, about) = 9.4% indexed
- Both <https://usamazahid.design/> and <https://www.usamazahid.design/> return 200 with same content — no 301

State of the Site — One Paragraph Executive Summary (for PDF footer)

usamazahid.design is a visually ambitious, technically modern Next.js portfolio (Vercel, 53 URLs, 33 blog posts, 4 detailed case studies, custom OS UI) that is SEO-invisible: 9% indexation, DR 3-7, 0-80 organic visits/month, 90% missing meta descriptions, www/apex duplicate, and all title equity wasted on zero-volume invented term 'Brand-to-URL'. It has strong raw material — 22.1k words of SaaS design content, good internal linking, Person/Service schema partially implemented, and one high-intent post 'how-much-does-saas-website-design-cost' — but no keyword targeting for transactional terms like 'SaaS UI/UX designer' (320 vol) or 'SaaS product designer' (210 vol) that competitors Eleken (DR 72) and Ramotion (DR 78) dominate. Fixing www->apex 301, rewriting 8 title tags, adding meta, noindexing utility pages will move indexation to 60%+ in 30 days; medium-term pillar cluster and case study SEO will capture commercial intent; long-term backlink outreach is required to lift DR to 30 and rank.
